Accident on Baseline.

While a group of scholars who had been atlending the Catechism classes now being conducted by the Rev Mr Osterman, pastor of St John's Church, Blueberry, were returning to their homes about 4.30 on Tuesday afternoon, they were run into by a car owned by a farmer who is said to live near Pine Ridge.

The children had seen the car coming round a curve, had heard the horn tooted, and had taken refuge at the side of the road. It would appear that the oncoming car had become unmanageable owing to the loose dirt in the road, left the roadway and had jumped the bank to where the children were.

Some five of the children are said to have received injuries; those receiving the most injuries being the young daughter of Mr P Schoepp; a daughter of Mr B B Miller, and a son of Mr F Litzenberger.

Mr P Schoepp was phoned to, and was taken to the scene of the accident by motor car. Mr Schoepp took his daughter and the daughter of Mr Miller to Stony Plain in his car, for an examination of their injuries.

Corp. Moses was in Edmonton at the time of the accident, but on his return he motored out to the scene and made an investigation.

Wednesday Half-Holiday.

During the months of June, July and August all places of business in Stony Plain will close Wednesday afternoon at one o'clock.

LOCAL NEWS.

Mrs R M Ostway and Mrs L Kowensky have been quite ill for the past week, but are able to be about again.

Mrs W. J. Whelan and daughter left for Kitscoty Friday morning, where they will make their home.

Miss Mabelle Clarke spent the past week in Jasper, a guest of her brother and wife, Mr and Mrs Franklin Clarke.

Mrs Jas Malloch has returned from the city, to take up her residence in Stony Plain again.

Mr E Wilcox intends spending his vacation at Camrose and Banff

Mr G Y McLean has been called to Nanton on account of the serious illness of his father.

Mrs Carr has moved to Edmonton and her many friends will miss her here.

The Stony Plain Canal along the Meridian Road, is nearing completion. The rabbit hurdles wnere the canal intersects the Baseline are a work of art, and have been greatly admired.

Rev G A Souder, the new pastor of the United Church, began his pastoral duties here last week. The services on Sunday were well attended, the church being crowded at the evening service. He is known as a splendid worker among young people and comes back among friends who recall his success and kindliness of manner during his former trips to Stony Plain.

The pupils of Mr G. Barth who took their examination in Music some two weeks ago have just received their certificates from the Toronto Conservatory. The following passed with honors—the Misses S Everett, Marie Clarke, Martha Miller, Rachel Willie. The following passed—Lillian Oppertshauser, Esther Dannhauser, Anna Moyer, Marcella Larson, Hilding Larson, James Alton.

At the local court, on Thursday, J Borys, charged with an assault on Nancy Tyrkalo, was fined $20 and costs.

At Tuesday's Court the adjourned case of the young man charged with giving or supplying Ph Schwindt of Spruce Grove (an interdict) with liquor, was again adjourned for a week. P G Thomson, the Edmontou lawyer, is counsel for accused.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert! M M Mecklenburg, eye specialist, 10159 101st St., Edmonton.

Another Step Toward Permanent Peace

Throughout the years of the Great War, the people of the allied nations were repeatedly told that it was a war to make the world safe for democracy, "a war to end war." And when at last the great struggle ended and the League of Nations came into being it was thought that, with the bitter experience of the war fresh in all minds, there would be little hesitation on the part of any country to join the League, and that, with 100 per cent. world membership in the League, world disarmament would follow in due course.

The refusal of the United States to have anything to do with the League of Nations,—the very country in which the idea originated,—came as a rude shock to all lovers and advocates of peace. It discouraged Europe, reawakened all the old fears, and actually led to renewed activity in the piling up of armaments. Nevertheless, the League struggled on, gaining new adherents, and, with each succeeding success in settling international disputes and preventing open ruptures, the League grew in strength and prestige. Nonetheless, so long as the United States remained aloof it was felt that the structure for world peace was imperfect and insecure.

Because of this fact, the recent action of Mr. Kellogg, United States Secretary of State, in inviting the nations of the world to enter into a multilateral treaty to outlaw war, was enthusiastically welcomed by all lovers of peace, and nowhere quite so heartily as in Canada and other parts of the British Empire.

Already fifteen nations, including, with the exception of Russia, all the Great Powers, have signified their willingness to sign such a treaty. The draft of this momentous international document is brief and to the point, and, as it may well prove to be the Magna Charta of world peace, it is worthy of the widest possible reproduction in order that all people, everywhere, may read it. The preamble, in part, is as follows:

"Deeply sensible of their solemn duty to promote the welfare of mankind;

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated;

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any signatory power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this treaty;

"Hopeful that, encouraged by their example, all the other nations of the world will join in this humane endeavor, and by adhering to the present treaty as soon as it comes into force, bring peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy."

Then follows the names of the fifteen nations who have signified their willingness to sign such a treaty, namely: Australia, Belgium, Canada, Czecho-Slovakia, France, Germany, Great Britain, India, Irish Free State, Italy, Japan, New Zealand, Poland, South Africa, United States of America.

To what do they agree? Having approved the declarations in the preamble quoted above, they bind themselves as follows:

"Article I. The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

"Article II. The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

"Article III. The present treaty shall be ratified by the high contracting parties named in the preamble in accordance with their respective constitutional requirements and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at (————————).

"This treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other powers of the world. Every instrument evidencing the adherence of a power shall be deposited at (————————), and the treaty shall immediately upon such deposit become effective as between the power thus adhering and the other powers parties hereto."

That is the whole document, beautiful in its simplicity, momentous in its sweeping renunciation of war under any and all circumstances. It does not replace the League of Nations, but adds power and strength to it. No loopholes are left, and should any nation signing this treaty ever again resort to war it would become, as never before, an outlaw among the nations.

Show Canadian Films

Views Of Canada To Be Shown In Britain and Central Europe

"Seeing Canada" films, made by Canadian Government, will be shown in from 300 to 500 British theatres this year as well as in Germany and Central Europe, says Captain Frank Badgeley, M.C., director of the Canadian Government Motion Picture Bureau, upon his return from Great Britain. He expressed a belief that in the near future Canada would become an important field for the British Empire pictures.

Substitutes Cards For Pistol

Affair Of Honor In Czecho-Slovakia Settled In New Way

Pistols have given way to cards in the settlement of "affairs of honor" in Czecho-Slovakia, judging by the method adopted by a business man at Bruenn, near Prague, to avenge an insult.

An engineer in the town is said to have given offence to the business man, who challenged him to a duel. "Why not settle the affair at cards?" another man suggested. The men agreed, and sat down at the card-table to play for a stake of £1,500. The business man won.

Alberta Act Invalid

Privy Council Upholds Ruling Of Supreme Court Of Canada

Both the appeal of the province of Alberta and the counter appeal of the Dominion of Canada from a Canada Supreme Court decision respecting the question of whether the right of the Crown upon intestacy is a provincial or Dominion right were dismissed without costs by the judicial committee of the Privy Council. The case involved the validity of the Ultimate Heir Act of the legislature of Alberta.

The judgment of the Privy Council upholds a ruling of the Supreme Court of Canada that the Ultimate Heir Act of Alberta is invalid. The Act provides that where a person dies without legitimate heirs, certain of the property goes to the University of Alberta.

HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular out-of-doors exercise. But a lack of appetite and tired, aching limbs tend to hinder progress. To save the weak, thin-blooded sufferer, she must have new, rich blood, and nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich and increase the blood supply, they help the appetite and aid digestion, relieve the weary back and limbs, thus bringing new health and strength and transforming anaemic girls and women into cheerful, happy people.

The value of Dr. Williams' Pink Pills in the case of anaemic girls is proved by the case of Miss Lucy Stoddart, Margaretville, N.S., who says: "From the age of 12 to 15, I was in an anaemic condition. I was very thin and nervous, had no appetite and had no desire to take part in the doings of those of my age. My mother got tonic after tonic for me, but they did me very little good. Then Dr. Williams' Pink Pills were recommended and almost from the first they seemed to be just what was needed to restore my strength. After taking the pills for a time I felt an altogether different girl. I got up in the morning feeling bright and active, and ready for work or play. Since then I have always taken a couple of boxes of Dr. Williams' Pink Pills in the spring as a tonic and have thus kept in the best of condition.

Every weak girl should promptly follow the example of Miss Stoddart, feeling sure that the pills will renew her health. You can get the pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Eskimo Census Taken

A census of the Eskimo people has just been completed. From the most reliable sources it is estimated that there are 7,103 Eskimos in Canada.

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

Arresting Decay In Wood

New Treatment Being Used May Make It Imperishable

A new tool has been invented for the purpose of giving logs a "hypodermic injection" to preserve them. This new scientific method is being used to inject into telegraph poles a spreading paste that is said to keep fungi at bay. Many years are said to be added to the pole's life. This treatment of wood is a step that may lead eventually to complete arrest of decay. If that ideal is accomplished, buildings of wood can be erected that will be as imperishable as structures of stone, brick, or steel, while the cost will be much less. The effect will be that of transmuting wood into rock.

Whther the corn be of old or new growth, it must yield to Holloway's Corn Remover.

It has been estimated that a hospital doctor walks an average of 16 miles a day in the course of his duties; a shop assistant eight miles; a waiter 12 miles, and a tram conductor seven miles.

Sunburn? Use Minard's Liniment.

France Has Too Much Coal

Production Rises Until There Is No Need To Import

France, desperately short of coal for ten years, and always an importer, now has too much of it. For the first time French production equals consumption and imported coal is threatening to break the market.

When the Germans flooded French coal mines in the north during the World War, France lost half of her fuel and it has been a long struggle to get back to normal. Not only was the pre-war figure of 40,000,000 tons annually reached, but last year it went up to 60,000,000 and the Saar Valley has added another 13,000,000 tons.

All European coal mines have been working hard since the war because British strikes, the occupation of the Ruhr and the trouble in Upper Silesia created big shortages. Now that all are at work, Europe, according to French figures given to the League of Nations recently, has a surplus of 60,000,000 or 70,000,000 tons a year.

As all countries for generations have considered France as an importer of coal, they all still try to capture the market there, ignoring the fact that France now mines all she burns. Therefore the French coal operators are puzzling how to reduce costs; curtail productioon and restrict imports so coal won't become too cheap.

Railways Arrange New Circle Tour

Convenient Visit To Glacier, Waterton and Jasper Parks Is Made Possible

An arrangement has been completed by the Great Northern and Canadian National Railways to make available to tourists a circle tour of three of the greatest playgrounds in the world. Under it tourists will be able to visit Glacier National Park, Alberta, without loss of time and at a considerable reduction in cost.

The inter-change point between the two companies will be Calgary where passengers for Jasper will take the Canadian National Railways and those for Watertoon and Glacier will take Great Northern automobiles. The autos and the trains will make connections and summer tourist fares will apply in both cases. In the past it has only been possible for travellers to combine these places in one visit by making a round-about and expensive trip.

In Glacier and Waterton Parks the Great Northern Railway operates a number of splendid hotels, among which are The Prince of Wales Hotel, the Glacier Park Hotel, and the Many Glaciers Hotel. In Jasper, the Canadian National Railways operate Jasper Park Lodge, a unique and distinctive summer resort.

Find Blue Best Color

Blue is the most effective color to attract policemen at night, according to tests made by city officials of Sheffield, England. The city has just installed in outlying districts booths surmounted by powerful blue lamps, which when lighted by a switch in central office, summond the policemen from their beats to nearby telephones to receive instructions.

HAMILTON, CANADA

Canadian Arctic Explorer Heads Expedition For Purpose Of Locating the Magnetic Pole

In quest of treasure relics and to conduct important Arctic research work, Major L. T. Burwash, war veteran, Arctic exploratory engineer and Canadian government official, will leave shortly on a 5,000 mile jaunt to end at the magnetic pole.

Travelling by rail, boat and dog team, Major Burwash will traverse nearly 900 miles of icy Arctic waters, with only native Eskimos, a stray trapper or fur trader, to assist him to navigate a forty foot government launch. His destination at the magnetic pole cannot be reached until late in September or October. His task will not be completed before the autumn of 1929.

At "the top of the world," Major Burwash will make a scientific examination to determine the extent to which the magnetic pole has shifted since Amundsen made his investigation about 1908. Each year the magnetic pole varies in a westerly direction; and its present position, once secured, will be noted on the charts of mariners who ply the seven seas.

Records of the ill-fated expedition of Sir John Franklin—central figure in the chapter of Arctic exploration of the nineteenth century—will also be sought by Major Burwash. The two ships "Erebus" and "Terror," carrying the Franklin party, met disaster near the magnetic pole in 1845. Some of the records were found on Boothia peninsula; and it is said that one of these ships may be seen in the Arctic ocean somewhere near King William Island or Boothia Peninsula. If this theory is found to be correct, the ship may be lifted to obtain for Canada the invaluable records and relics believed to be aboard her.

Conditions among the Eskimos north of the districts of Mackenzie and Keewatin will be examined by Major Burwash; and his survey in that district will be the first since care of the Eskimos was transferred from the Indian department to the North West Territories and Yukon branch early this year. An examination of navigating conditions in Franklin Strait and Peel Sound will be made; and, in addition, Major Burwash, will investigate the proposed tractor-train route from Wager Bay on the west coast of Hudson Bay to Cockburn Bay south of King William Island.

Use Modern Methods

Birds Ride On Airplanes and Horses On Motor Trucks

Airmen find that birds are not afraid of airplanes as they used to be. Now the birds make use of them to help them along in their flights. It is not uncommon, airmen say, to find ten or twenty birds hooking a ride, all comfortably settled on the machine and being relieved of much effort and fatigue on a long flight.

Not long ago we saw two horses being hauled to market on a motor truck at a swifter pace than any horse ever travelled before. They seemed interested in the scenery. — Capper's Weekly.

The fact that Nero was a fiddler instead of a saxophone player must have been some satisfaction to the Romans.

The keener the critic the more cutting the criticism.

"Look here, why are you following me about all day?"

"For protection. My wife has threatened to beat me!"—Buen Humor, Madrid.

ALL FOODS CONTAIN WATER

Body Gets Sufficient Even If People Drink Little

Water is absolutely essential if the body is to keep up its activities. It is necessary not only to aid in building up the tissue, but in order to permit the carrying on of all of the chemical and physical functions that take place.

Most of us get more water than we drink as such through the fact that practically every food substance contains some water and most of the beverages are practically entirely water. Milk contains 88 per cent. water, wines anywhere from 85 to 95 per cent., and even distilled alcoholic drinks are usually more than one-half water.

If both food and water are withheld, life cannot be prolonged for more than eight or ten days. With air and water life can be prolonged for a considerable time, even though food is not given. Professional fasters always drink water during the starvation period. Some of them carry on from three to five weeks without food.

Milk is probably the best of all beverages, particularly when it is taken from properly inspected cows under sanitary conditions, transported under clean conditions to the place where it is used, and pasturized in most instances before use.

Lemonade and other drinks made from citrus fruits are excellent because they counteract acidity in the body and serve as a valuable source of vitamin C.

Tea and coffee are good beverages if taken in moderation; if taken in excess, overstimulation may result due to an overdose of the drug called caffein, which has the power of stimulating the higher centres of the brain. Tea varies in its qualities according to the manner in which it is prepared.

One expert recommends that the proper way to make tea is to pour it off the leaves after five minutes, putting it in another warmed teapot.

Soda water, pops and similar beverages have a certain value; due to the amount of carbonate they contain.—By Dr. Morris Fishbein.

Up-To-Date Shop

Fifth Avenue, New York, has a shop dealing exclusively in aviation products and accessories. Everything is for sale, from airplane goggles to a commercial ship. The shop maintains hangars on Long Island with a corps of instructors to teach those who make purchases.

PREMIER OF NEWFOUNDLAND

Hon. W. S. Monroe, premier of Newfoundland, is to resign office next month, it is reported. Pending a general election in the fall he will probably be succeeded by Sir John Bennett, colonial secretary.

Asphalt Highway Across Canada

Union Of Canadian Municipalities Has An Ambitious Program

Immediate construction of an asphalt highway right across Canada was urged at the 28th Annual Convention of the Union of Canadian Municipalities at Winnipeg. Dominion and Provincial Governments will be memorialized as to the necessity for such a road. It is estimated that the cost would be $50,000,000 and cnostruction would occupy five years. It would afford to motorists access to much of the most beautiful scenery on the continent, and in view of the vast number from the United States who are now touring in Canada each summer the expenditure would not be without direct financial returns.

Developing Talc Industry

Establishment Of a Manufacturing Plant In Calgary Is Being Considered

National Talc, Limited, is considering the establishment of a manufacturing plant in Calgary to utilize the raw talc deposits of the Rocky Mountains. About seven miles of the new road up the Red Earth Valley from Massive to the blue talc property on Red Mountain were constructed last summer and work is again proceeding with the idea of completing the road by August. Production will be started on the blue talc property as soon as weather conditions permit. The American Lava Corporation of Chattanooga, Tennessee, are reported willing to purchase all of this year's production of the plant.

Great political reforms are set in motion by the hand that rocks the cradle.

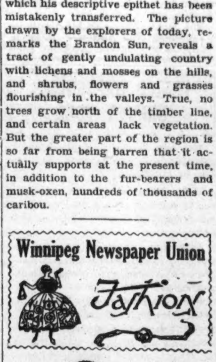
Geographical Misconceptions That Have Retarded The Development Of Canada

Partial knowledge and assumptions based on insufficient data have been responsible for many mistaken judgments and belief in obstacles that had no real existence. Evidence of this abounds in the pages of history, and the process of revising and rectifying long-established opinions continues with little sign of abatement. Until recently belief persisted that the interior of the island continent of Australia was a rocky and barren desert, where explorers ran grave risk of perishing miserably for lack of water. Now, with more extensive and accurate knowledge, the vast central region of Australia has asumed a widely different aspect, with many districts well adapted for productive use and with ample water resources, that only need to be tapped to make the wilderness blossom as the rose.

Canada is now undergoing a similar process, with the result that many obstacles to unification of interest, once deemed insuperable, are now disappearing in the light of better knowledge. Not so long ago men whose views were regarded as authoritative saw in the clay belt of North Ontario and in the so-called barren lands of the great Northwest barriers that doomed Eastern and Western Canada to perpetual isolation, one from the other. These imaginary barren and infertile tracts occupied an area amounting approximately to one-sixth of the total area of the Dominion. Until recently these ideas remained fixed convictions in the minds of most Canadians, accepted as hardships imposed by nature and incapable of more than alleviation to a limited degree. Gradually, through the penetration of these regions by the surveyors and prospectors of the topographical survey, it has increasingly become evident that the older conception is due for radical revision.

Officials and travellers, in the days when Central and Western North America were unknown quantities, often registered judgments for reasons that now seem ridiculous. A British official is said to have condemned the territory, now occupied by the states of Oregon and Washington, as worthless because the fish of one of its numerous streams would not rise to a favorite artificial fly. How the name "Barren Grounds" came to be applied to what has been proved to rank among the most fertile areas in the world, is contained in the account of the exploratory journeys of Henry Kelsey in the last quarter of the seventeenth century. Among that traveller's longest journeys one came between 1690 and 1692, when he journeyed from Port Nelson on Hudson's Bay westward by way of the Hayes and Saskatchewan rivers. Undertaken primarily to investigate the fur trade possibilities of the country, its agricultural potentialities never seem to have dawned on him.

A thousand miles north of Kelsey's route, beyond the forested lands of the Canadian west and stretching to the Arctic Ocean and Hudson's Bay, are the Great Northern plains to which his descriptive epithet has been mistakenly transferred. The picture drawn by the explorers of today, remarks the Brandon Sun, reveals a tract of gently undulating country with lichens and mosses on the hills, and shrubs, flowers and grasses flourishing in the valleys. True, no trees grow north of the timber line, and certain areas lack vegetation. But the greater part of the region is so far from being barren that it actually supports at the present time, in addition to the fur-bearers and musk-oxen, hundreds of thousands of caribou.



Long-Waisted Slip-On Dress

Long-waisted slip-on dress, with open neck and diagonal pin tucks. One-piece, long dart-fitted sleeves or short sleeves. Attached three-piece skirt. Separate belt. Two cascade trimming pieces stitched to left side of waist and skirt. For ladies and misses.

Sizes 16 years, 36, 38, 40, 42 inches bust.

Size 36 requires 3 yards 36-inch material with long sleeves. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Spain Insures Travellers

Beginning July 1, all persons travelling by rail or water in Spain will be insured against accident, the cost being added to the price of boat or train tickets. The insurance covers injuries to passengers first and carrier employees next. Proceeds will be devoted to an agency encouraging tours in Spain.

FOLKSONG AND HANDICRAFT FESTIVAL

This orchestra playing Ukrainian airs, the members of Ukrainian origin and arrayed in peasant costume of that country, made a great hit at the New Canadian Folksong and Handicraft Festival, held at the Royal Alexandra Hotel, Winnipeg, from June 19 to 23. Over 400 performers, representing different European nationalities, participated.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

WORLD HAPPENINGS BRIEFLY TOLD

The new German dirigible, LZ-127, may make a trip to East Asia by way of California.

Miss Mercedes Gleitze, London stenographer, failed in an attempt to swim the Irish Channel to Great Britain.

Assurance that representations made on behalf of the blind in Canada will receive government consideration has been given to a delegation of blind persons by Hon. J. A. Robb, Minister of Finance.

The King has approved the appointment of Sir John Middleton as Governor-General and Commander-in-Chief of Newfoundland, in succession to Sir William Allardyce, whose term has expired.

The University of Wisconsin, at Madison, gave recognition to the attainments of its most celebrated former student, Col. Charles A. Lindbergh, by conferring the honorary degree of Doctor of Laws. Lindbergh arrived there by plane.

Fritz Von Opel's rocket car, the Rak-3, was wrecked, but not until after it had attained a speed of 158 miles an hour. This is claimed as a world record on rails. There was no driver in the car.

England's most picturesque visitor, Sir Offri Atta, blue-black potentate of Akim Abuakwa, has received from the King at Buckingham Palace the accolade of his new British knighthood.

Col. Charles A. Lindbergh carries a blanket public liability aviation insurance policy to the amount of $100,000 on any aircraft piloted by him. The policy also covers him for property damage.

Fur-bearing animals in Ontario are growing scarcer each year, as frontiers of civilization move forward, it is indicated in a statement issued by the Department of Fish and Game, which shows that royalties received last year totalled $112,762, compared with $130,793 in 1926. With the trapping of beaver eliminated the amount is likely to be still smaller for 1928.

Raw recruits are probably so called because they are not accustomed to fire.

BABY GIRL HAD DIARRHŒA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhœa. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any

why, I wouldn't be without it where there are children.'

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhœa and was running around as well as ever."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Another Great Possibility

Passengers May Soon Be Transferred From Moving Train To Dirigible

Transfer of passengers to and from moving trains by dirigibles was described at Belleville, Ills., as a "practicable possibility of the near future," by Col. John A. Paegelow, veteran commandant of Scott army field.

Paegelow based his opinion on the successful "dirigible-to-train" transfer of mail, in which a 210-foot non-rigid blimp synchronized its flying speed of 30 miles per hour with that of a moving Illinois Central train.

The dirigible came to rest on top of a coach for a period of few seconds—long enough to effect the transfer of a pouch of mail without difficulty.

The army blimp which made the test carried a crew of six men.

BABY'S OWN TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a laxative, but do not gripe. They are soothing, but do not contain one particle of opiate or other ingredient that can in any way do the slightest harm to the most delicate child.

Baby's Own Tablets reduce fever, relieve colic, banish constipation and indigestion, check diarrhoea, sweeten the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and repose. In fact they are as good as a doctor in the home, and once a mother has used them for her little ones she will use nothing else. Thousands of mothers bear testimony as to this. Among them is Mrs. Hurst, Pine Falls, Man., who says:—"I was told to try Baby's Own Tablets by a friend who had used them for all her little ones and said she could not do without them. After using them for my baby boy I quite agree with her and certainly think they are the finest medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

New experiences awaited us the following day when as guests of the Port of London Authority, we were taken to see something of what London's handling facilities are. It was not possible to see more than a small part, for the Port of London, in one year, handles merchandise to the value of hundreds of millions of pounds sterling. For example, the imports and exports passed through the port in 1926 totalled in value $3,500,000,000 and included 65,000,000 bushels of wheat. In the same year 50,000,000 tons net register of shipping entered and left the port. Walking through one set of showrooms, ten acres in extent, we visited the Ivory Room, where we were astounded to see a perfect specimen of pre-historic mammoth tusks 11 feet long, weighing 163 pounds, and having an estimated age of 56,000 years. In the State Room $525,000 worth of pepper was stored, and an interesting exhibit was a 28 lb. weight floating in a bath of mercury. The Wool Room which contained a number of bales of Canadian wool stores in a single year nearly 2,000,000 bales.

Another interesting warehouse was the Iodine Room, holding 25,000 small hide-bound kegs of iodine, every one worth $500. The hide covering is necessary because of the rotting effect of iodine which destroys the wooden kegs in a comparatively short space of time.

But the thrill of the day came when we explored a portion of the Port's wine vaults. Before descending to the cellars we were handed oil torches fastened to the end of staves. Torches such as these have been used for 120 years. The temperature of the vaults never varies from 60 degrees, yet the only means of regulating it are incandescent lights, and the amount of sawdust on the floor. Fungus produced on the roof of the cellars by the fumes of the wine is a curious characteristic. In the brandy vaults this fungus is absent. Twenty-two thousand pipes of wine, each worth $500 can be accommodated in these vaults which have twenty-eight miles of metal runways, apart from the vast stores of spirits contained in other vaults not included in the day's itinerary.

Again in the open air we boarded a launch en route to the S.S. Minnewaska, where we were due to lunch as guests of the Port, under the chairmanship of Lord Ritchie of Dundee. The novelty of luncheon on this beautiful ship, surrounded by great liners from almost every country in the world made a deep impression. This was followed by a river trip back to London.

In the evening we were the guests of the Empire Marketing Board at dinner in the Hyde Park Hotel and had an opportunity of learning at first hand the valuable work being done by this organization to encourage the consumption of products produced within the Empire. The sum of five million dollars per year has been placed at its disposal by Parliament to further the marketing of Empire products. The Board is a non-party body and includes representatives of the Dominions and Colonies. Agricultural research is also an important phase of its work. The chairman, on the occasion of our visit, was Lord Lovat, the Under-Secretary of States for the Dominions, who told us something of the work of the Board, which was further explained by Sir Halford Mackinder, chairman of the Imperial Economic Committee.

The next day's programme provided one of the most interesting mornings of our stay in London. This was a visit to the Tower, a grim fortress which we entered with mixed feelings, for here and on Tower Hill perished some of the most renowned men and women of their day. Here the beautiful Anne Boleyn was beheaded; and here Lady Jane Grey saw the headless body of her husband carried past her on the morning when she knew that she was to die. In it Sir Thomas Moore, Archbishop Cranmer, Sir Walter Raleigh and the little Princes met their tragic fates, and though these things happened in the days gone by, one feels the Tower to be sinister still. Even in our own time was it not chosen as the place in which the spies in the Great War should meet their doom?

We were admitted by Yeoman of the Guard "Beefeaters" who still wear the quaint uniform which was adopted in the time of Henry VII. We were shown the Bloody Tower where the bones of the two murdered Princes were found and the room (reconstructed), in which Sir Walter Raleigh, when a prisoner wrote his History of the World.

In the White Tower we saw the chamber in which Guy Fawkes and his fellow-conspirators were tortured in 1605. Here too, were the apartments occupied by Queen Elizabeth when she herself was a prisoner in the Tower. We saw the block and execution axes, one of which has a nick in the blade where it struck the neck of a victim. And then, how close to our Canadian hearts it came, we saw the cloak in which Wolfe died on the Heights of Abraham.

Many quaint forms are still retained in the administration of the Tower. The gates are shut at night to the accompaniment of ancient ceremonial and after midnight no one may enter the precincts without giving the password.

In one of the strong rooms of the Tower there repose the Crown Jewels, including the crowns of King George and Queen Mary, a display of treasure which amazed us all.

The Tower of London was built by William the Conqueror, and it is said that the site on which it stands was selected by Julius Caesar as a location for a fortress. One of the most interesting features of the Tower is the portcullis, said to be the oldest one in existence in working order.

On our way to the Tower we stopped at St. Paul's Cathedral, Sir Christopher Wren's masterpiece, but, owing to the grouting operations on the piers which support the great dome, it was not possible to see its interior to advantage, most of it being boarded up and inaccessible. Thus, we did not see the crypt or enter the Whispering Gallery.

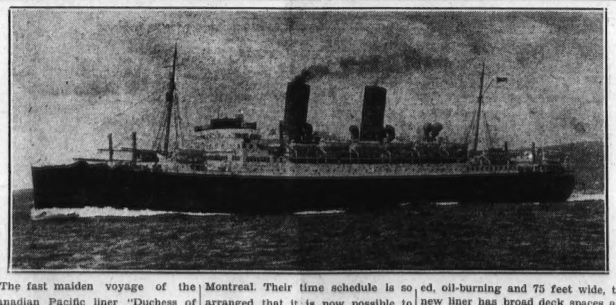
(To Be Continued.)

For Both House and Stable. — There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Eclectric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

Question Of Relationship

In a recent court case at Toronto, a nice question in relationships was propounded. The plaintiff, a woman, was testifying against a chauffeur. "Isn't he your brother-in-law?" she was asked by counsel. "Didn't you say he was?" "No. I said he was my husband's sister's husband's brother!" The council gave up any more questioning on this point.

POPULARIZING THE ST. LAWRENCE ROUTE



The fast maiden voyage of the Canadian Pacific liner "Duchess of Bedford," just put into the service of the St. Lawrence route as the finest of a quartette of 20,000 ton Canadian Pacific steamers has called wide attention to the increased popularity of the St. Lawrence route.

In addition to the "Duchess of Bedford" three other "Duchesses" will shortly be commissioned and this fleet of Cabin Class steamers will constitute the largest ships to call at Montreal. Their time schedule is so arranged that it is now possible to breakfast in Liverpool on one Friday and in Montreal the following Friday —an unique service for the St. Lawrence.

Excellently appointed and furnished, the "Duchesses" open a new era in Cabin Class travel and experienced travellers who have seen the new liner compare her accommodations very favorably with first class ships.

Six hundred feet long, two-funnelled, oil-burning and 75 feet wide, the new liner has broad deck spaces and many marine innovations, all conducive to passenger comfort. She is commanded by Captain H. Siddons, R.N.R., whose 21 years in the service of the Canadian Pacific Steamships have taken him through the seven seas. He was formerly in command of the "Minnedosa" and "Montroyal," having been in charge of the latter vessel on several cruises through the West Indies—a feature to be repeated by the "Duchess of Bedford."

SUNDAY SCHOOL LESSON

JULY 8

SAUL AND STEPHEN

Golden Text: "Be thou faithful unto death, and I will give thee a crown of life."—Revelations 2.10.

Lesson: Acts 7.54; 8.3; 22.3, 4, 19, 20; 26.4, 5, 9-11; Galatians 1.13, 14.

Devotional Reading: Psalm 116.12-19.

Explanations and Comments

Stephen's Arrest and Defense, Acts 6.8 to 7.56.—When the Greek speaking Jews who were temporarily or permanently staying in Jerusalem attempted to dispute with one of the leaders among the disciples of Jesus, they found this man, Stephen, more than a match for all their logic and religious philosophy. Their original hatred of him, as a man full of faith and of the Holy Spirit (Acts 6.5), and therefore full of grace and power, then turned into cunning malice. They resorted to calumny, raised up false witnesses against him, seized him and brought him before the Sanhedrin.

From Stephen's defense, 7.48, it is evident he had correctly taught that God could be worshiped not only in the temple, but everywhere. As was true with Jesus (Mark 14.58), Stephen's words were distorted by false witnesses: he was accused of teaching that Jesus of Nazareth would destroy the honored temple, and would change the revered Mosaic laws. Fearlessly, Stephen undertook his defense. Rehearsing the ancient history of Israel, he skilfully showed that God's revelation to His people had been progressive, that theirs was a spiritual religion, and that God had no need of an earthly temple. At first, apparently fascinated by the clarity and truth of his words, his hearers were silently attentive; but as they caught the drift of his argument they displayed signs of anger which Stephen could not fail to see.

If, before the coming of the violent end which he saw approaching, Stephen was to apply his words to his hearers, he must speak quickly. "Ye do always resist the Holy Spirit," he cried boldly. "Of the Righteous One ye have become murderers!" At once they "were cut to the heart"; they "gnashed on him with their teeth," that is, only by a "brute-like grinding of their teeth" were they able to restrain their unreasoning rage. But he, still filled with the Holy Spirit, saw "the heavens opened" (a familiar Jewish figure of speech signifying one's insight into divine things) "and the Son of Man standing on the right hand of God"; and, in apparently utter disregard of the frenzied fury around him, he told of what he saw.

Receives Large Salary

Chief Harpooner Earned $89,000 In Nine Months' Whale Hunt

Few occupations tax the nerves of man more than whale hunting, but few occupations pay better. When the whale-hunting fleet recently returned from the Antarctic after a nine-months' cruise, the chief harpooner had earned a "normal" income of $33,000. In addition to this sum he had a contract granting him $20 for each whale he killed. During the nine months he killed 300 whale, and his extra income amounted to $6,000. Hardly one man in a thousand may hope to be a really good harpooner. It is upon his ability that the result of the expedition largely depends, and though his profit may seem high, it is modest compared with the profit he brings to the expedition.

Changes Name Again

Peking Will Be Known As Peiping Meaning "Northern Peace"

The nationalist government political council has decided to change the name of the historic Manchu capital. Peking, to Peiping, meaning "Northern Peace."

The action is considered at Shanghai as an attempt by the Nanking government to destroy Peking's political importance and further that of Nanking, which they insist is now the National capital.

The announcement of the action of the council states "it is hoped Peking will continue as a centre of art and culture, but as a political centre it is dead."

Vacationists!

You'll find many uses for **Minard's** during your vacation days. Pack a bottle in your grip.

INFLUENCE OF WHEAT POOL ON WORLD MARKETS

Edmonton.—Tales of the success of producer co-operative livestock associations in the United States were unfolded before the Institute of Co-operation here by C. G. Randell, of the United States Department of Agriculture's division of co-operative marketing, Washington.

"Bigger and better livestock co-operation" was the topic of Mr. Randell. He outlined the progress of farmer co-operatives in the republic, stating that their turnover last year exceeded two and a half millions.

Mr. Randell gave six reasons for success, guide posts to new standards of efficiency on the part of co-operatives; capable and efficient managers and employees; able and working board of directors; well informed active and supporting membership; proper financing and facilities for doing business; volume of livestock sufficient for economic operation; working program, embracing perhaps a research department.

"The greater control of our product, the greater control of our price," was the axiom laid down by George McIvor, general sales manager, Canadian Wheat Pools, in an address on "Functions of a Central Selling Agency." He expressed the desire to see every farmer in the West a pool member and was of the opinion that if the pool controlled 75 per cent. of the Canadian wheat crop (it now has 55 per cent.) it would virtually be able to control the Canadian price, having regard to world markets.

He remarked that the total of wheat traded upon the world markets was 800,000,000 bushels and when the Canadian pools handled 220,000,000 bushels, it could be readily seen what influence it already has on the world market.

"Some problems of management" were dealt with by E. B. Ramsay, of Winnipeg, manager of the Canadian Wheat Pool.

"There is no trick of management that can make up for a badly informed and dissatisfied membership," said Mr. Ramsay. He added that when a commercial concern failed, it was soon forgotten, while every co-operative that failed struck a blow at world co-operation.

May Merge Wireless and Cable Interests

Report Of Pacific Cable Conference Is Awaited

London.—The Evening Standard said that it understood an announcement was expected immediately to the effect that the government would approve a merger of wireless and cable interests. Consequently, Marconi stock rose a dollar a share on the stock exchange, and shares of Eastern Telegraphs were also active.

Pending report of the Pacific Cable Conference which has been meeting in London for some time, rumors have been spread of a huge merger of existing cable and wireless company to take over from the various governments of the Empire the present system of Imperial communications. Canada is interested as a part operator of the Pacific cable system, the revenue from which has in recent years been unsatisfactory.

Celebrates Anniversary

London.—The Duke of Connaught, former Governor-General of Canada, celebrated the sixtieth anniversary of his entry into the army by entertaining the members of the army council. The Duke, who recently observed his 78th birthday, enjoys wonderful health and fulfills a constant series of public and social engagements, although he has eliminated evening engagements.

Jews Promise Three Millions

London.—The Jews of the United States were pledged to raise annually a minimum of $3,000,000 to make up for the next five years the annual budget for the rebuilding of Palestine as a Jewish national home in accordance with the terms of the mandate of the League of Nations entrusted to Great Britain.

W. N. U. 1740

Lord Plumer Vacating Post In Palestine

Has Held Position As Commissioner For Three Years

London. — Field Marshal Lord Plumer will shortly vacate the high commissionship of Palestine, which he has held since 1925. The Daily Express, in an article from its Jerusalem correspondent, says that the retirement will be brought about by Lord Plumer's differences with the British colonial office over the division of the cost of the Trans-Jordania force as between the British Exchequer and Palestine, Palestine having already a budget deficiency of $5,000,000.

Lord Plumer commanded the second army during some of the most important operations of the Belgian front in the war, in some of which the Canadian forces took part. He was specially mentioned for good work in connection with railway and forestry battalions. Lord Plumer, who is 71 years old, as a matter of fact, had Canadians constantly with him during the war and he also commanded men from the Dominions in the South African war.

Wireworms Damage Saskatchewan Crops

Report Shows Activity Was Unusually Severe This Spring

Regina. — The greatest damage done to Saskatchewan crops this year is by wireworms, according to the recently issued report of the Dominion Entomological Laboratory, Saskatoon, on insect conditions. Much of the damage attributed to cutworms is in reality due to wireworms, it is stated. "Wireworm damage appears to have been unusually severe this spring due to the prevailing dry weather, the use of much unreliable seed grain and the fact that moisture was sufficiently high to enable the wireworms to keep working on much of the seed and particularly the lower part of the stem," says the report. "A certain degree of recovery has been noted as a result of the recent rains, which, however, may tend to lengthen the period of wireworm activity." The forest tent caterpillar infestation now includes an area in the Lloydminster-Maidstone District and the American tent caterpillar is unusually abundant in Western Saskatchewan.

Wrong Man Executed

Tragic Miscarriage Of Justice Reported From Germany

Berlin.—"We therefore have no doubt that this unfortunate man was condemned to death and executed for a murder of which he was completely innocent."

This is the sensational statement with which the Mecklenburg-Strelitz Ministry of Justice confesses to a shocked public a miscarriage of justice, which is described by Berlin newspapers as the most terrible in German history within the last 50 years.

The announcement was accompanied by the dramatic disclosure that four men on whose evidence the prisoner had been condemned have been arrested and have confessed that they themselves committed the crime for which this innocent man had suffered death.

Seach For Lost Continent

Expedition Has Left New York For the Azores

New York. — An expedition in search of traces of the supposedly "lost continent" of Atlantis has sailed for the Azores.

The expedition's ship, named the Atlantis, was designed by Columbus O'Donnell Iselin, 2nd, of New York, captain of the expedition, and is equipped with machinery invented by Iselin, which is expected to dredge the ocean bottom at a depth of three miles.

May Try Westward Crossing

Paris.—Another Westward crossing of the Atlantic by aeroplane may be attempted early in July. The trans-Atlantic aeroplane of Maurice Drouhin and Joseph Lebrix should be ready before July 4. This flight will be a commercial venture, Lebrix said in a speech at Lyons.

PLANS SPEAKING TOUR

Hon. R. B. Bennett, leader of the Federal Conservative Party, who is planning an extensive speaking tour of the dominion. This picture was taken just at the end of the session.

Imitation Strike At Antwerp Made Real

Dock Workers Turned Joke Into Real Thing

Antwerp, Belgium.—An imitation strike turned out to be a real one, with 11,000 dock workers calling off work in the harbor of Antwerp and refusing to listen to the pleas of the shippers to return to their jobs. The affair started out as a joke.

Two Communists bicycled around the harbor, telling the surprised dockers that the union had declared a strike to get a raise of 10 francs (40 cents) a day. The union officials immediately decided to make the strike a real thing.

Receives Promotion

Winnipeg.—Robert Nelson Munroe, assistant division commissioner of immigration for Western Canada, has been promoted to a post in the Dominion office at Ottawa, according to word received.

"Big Tim" Murphy Slain

Assailants Use Machine Gun Method To Finish Gang Leader

Chicago. — "Big Tim" Murphy, Chicago labor leader, was shot and killed at his home at 2543 Morse Avenue, in the exclusive Rogers Park district, by assailants who attacked him with machine guns.

An automobile parked on a side street a few hundred yards away threw its glare of lamps on the labor leader as he stepped from the basement doorway, his silhouette reflected by the basement lights.

In response to a call, "Who is there?" Big Tim was answered by the rat-a-tat-tat of a machine gun.

He fell into the area-way, his brother-in-law grabbing his body and dragging it into the bungalow dining room.

Mrs. Murphy returned home as the brother-in-law, Harry Diggs, brought her husband's body into the room. The former state representative and labor leader apparently was in the direct line of fire from the machine guns, as Diggs escaped injury. Diggs said he saw "four or five men in a big automobile."

A neighbor said he at first thought the firing was some kind of a premature Fourth of July celebration until he learned that Big Tim was shot.

To Consider Kellogg Note

Japan Approves Of Latest Proposal To Outlaw War

Tokio.—The foreign office spokesman says that Japan was in complete accord with the latest proposal of Frank B. Kellogg, United States Secretary of State, for treaty to outlaw war. The cabinet was expected to meet soon, to consider the Kellogg draft, after which a reply would be sent. The spokesman said the government believed the proposed treaty did more to ensure the peace of the world than any similar document in history.

All Murders Are Solved

London. — Twenty-seven murders were committed in London last year, all of which were solved, according to a report by the Police Commissioner. Twelve persons were charged and ten murderers committed suicide, while one died in an asylum. The value of property stolen was $2,821,000. Property recovered amounted to $650,000.

Has Valuable Hands

New York.—Wm. Bloom's left hand has been insured for $200,000 by his employers, and his right hand for $375,000. He is a designer of sport togs.

LAKE DROPPED TWO INCHES

An excellent official opening of the western lakes and rivers was made this spring when several guests of the Banff Springs Hotel commandeered a big motor bus, for the five-mile journey to Lake Minnewanka where several good catches were made.

The best sport fell to G. Andrews, of Banff, who captured a thirty-pound lake trout after a long struggle. He practically swears that the water dropped two inches when the trout had been landed.

RESEARCH WORK IN CANADA TO RECEIVE IMPETUS

Ottawa.—Industrial and scientific research work in Canada will receive an impetus as a result of a visit made to Washington by Hon. James Malcolm, minister of trade and commerce, and Dr. Henry Marshall Tory, president of the national research council of Canada, who have returned to Ottawa. Mr. Malcolm and Dr. Tory obtained a bird's eye view of what is being done in the bureau of standards at Washington with the object to introducing the latest methods in Canadian laboratories, to be located in Ottawa, and with the purpose of co-ordinating research efforts throughout the Dominion.

Mr. Malcolm emphasized the fact that it is not the intention of the federal government to duplicate what is being done in the universities or provincial government laboratories in Canada, but rather to secure co-operation and eliminate overlapping. The national research council will assign Nova Scotia problems to the scientists of that province and to the experts of other provinces will be given tthe problems peculiar to their particular district. Financial aid will be given to scientists working in the various universities.

Plans for the new Canadian laboratories to be established on a ten acre site at the Dominion Experimental Farm, at Ottawa, are now in course of preparation and the government is confident the national research council, working in conjunction with the provinces and the universities, will accomplish notable work in connection with the economic development of Canada.

Drowned When Car Plunges Into River

Accident Happened When Driver Took Wrong Turn In Fog

Charlottetown, P.E.I.—Three young people, all natives of Elliotvale, P.E.I., were drowned, and two others narrowly escaped a similar fate, when a touring car took a wrong turn in the fog, and plunged into the river, at Southport recently. The deceased and survivors were all brothers and sisters.

George Walsh had driven the car here from New York, and took his brother and sisters out motoring, last night. They lost their sense of direction in the thick fog, and making a wrong turn, plunged over a wharf, into the river.

Refuses a Peerage

Retiring Speaker Of British House Of Commons Does Not Desire Title

London.—Right Hon. J. R. Whitley, who retired last week from the speakership of the House of Commons, has intimated to the government that for personal reasons he does not desire to accept the peerage which it is customary to confer upon speakers on their retirement.

His refusal breaks a precedent which has been maintained for more than 120 years. Out of ten speakers of the House of Commons who relinquished office since 1802, seven have been created viscounts.

Registration Cancelled

Panama.—Treasury officials have announced that the registration of all ships flying the Panaman flag which were found engaged in smuggling liquor or contraband into the U.S. had been cancelled. The ships affected were the Federal Ship, of Vancouver, B.C., which was seized more than a year ago by prohibition authorities on the West Coast of the U.S. and later released by court order, and the Chasma and the Hakadata.

Ambitious Project Planned

Regina, Sask.—According to a news despatch carried by a local newspaper, a move is being made at Lethbridge, Alta., to pipe gas from the natural field in Alberta to Moose Jaw, Regina, Brandon and Winnipeg. No names are divulged, but it is alleged that a bond issue will be floated in New York to obtain the necessary financial backing.

125 Times Around the World

IN pursuing its policy of consistent progress—in its continual search for new ideas . . . in its constant development of better cars . . . General Motors not only maintains its great International Research Laboratories and hundreds of skilled engineers, but also operates the first, largest and most completely equipped automobile proving ground in the world.

Here, on the vast fourteen-hundred-acre tract of the General Motors International Proving Ground, every type of road is duplicated, every condition of driving is reproduced. Here all makes of General Motors cars are constantly being subjected to the most searching tests. Here every principle developed by General Motors engineers is put to proof . . . every detail of each test car's performance carefully and closely checked. Here years of normal use are crowded into a few months of continuous, gruelling operation.

A typical example is offered by Chevrolet. Since the opening of the General Motors Proving Ground, Chevrolet cars alone have piled up over three million miles of testing . . . a distance equal to 125 times around the world.

In the countless millions of miles that General Motors cars have covered on the General Motors Proving Ground, there has been one great purpose kept in view . . . to improve, by constant testing, the quality and worth of every General Motors product.

Every Canadian buyer of a General Motors car gets a car built in Canada by Canadians to meet Canadian conditions of road and climate . . . a better car and a greater value because General Motors uses so freely and unsparingly its unequalled facilities for testing and research . . .

With better General Motors cars at the end of the journey, millions of miles is not too far to go.

Edmonton Exhibition.

Visitors at the Edmonton Exhibition, to be held July 16 to 21 next, will find extensive alterations and improvements have been made to the grounds and buildings. Five new cattle judging rings will be located immediately to the west of the cattle barns, and accomodation will be provided for spectators.

The art section has been moved to the old Administration Building leaving the entire upper floor for women's needlework and cooking.

The Prize List will be "bigger and better than ever." An entirely new prize will be that given for decorated stalls, $5 for the best decorated stall in each breed of horses and cattle, and $10 for the best decorated stall in any breed of live stock.

Grains will receive increased awards. The Alberta Pacific Grain Co has offered a silver cup for annual competition. A small replica of it will go to the winner each year for permanent possession.

Another new feature will be classes for farm women, including prizes for the best patchwork or piecework quilt, and the best pair of handknit socks and stockings.

A feature which will be a boon to parents is the free Baby Clinic, operated under the direct supervision of Provincial Dept. of Health.

CHAPTER XXVI.—Continued.

The next day Helmi went to the North Star Rooming House, walking wearily up the stairs to No. 19.

Mrs. Corbett opened the door to her as she had four months before, and again the anguish in the girl's face told its own story.

"My God! Helmi, is she dead?" asked Mrs. Corbett.

Helmi sat down before she answered.

"Is that all? Sure that's nothin'; every child takes scarlet fever. They're grand at the Isolation Hospital. I know big Miss Shaw up there, as grand a girl as ever went on rubber heels. Cheer up, Helmi, the little pet will be all right, please God. I thought the gypsies had stolen her by the look on your face, and I'm glad it's nothin' worse than scarlet fever."

"My man has gone to the war!" said Helmi brokenly; "I saw him on the train. He did not see me—he does not care about me."

Mrs. Corbett paused. This was a harder complication than the illness of little Lili, and for a moment even this determined optimist was floored —but only for a moment.

"Well, sure, when he's there you know where he is, and it's noble of him to go, Helmi—remember that. Now here, dear, take a cup of tea. Yes you can; a person can always take a cup of tea, no matter who's gone, and it makes life look a little brighter. Drink it down, dear, and have another. You look better now. Don't get down to mourning, Helmi; there's nothin' happened yet that can't come right, remember that; and your darlin', blessed child with God's blessin,' will come through the fever just the way we all did, and your man will come back again."

"But he doesn't want me any more. . . . . I konw now. The magistrate has turned him against me. I said I would kill that man, and I will."

"No, dear, no; you mustn't talk of killin' anyone. God will deal with the wicked in His own good time. You come with me to the Army and you'll find comfort in God's love. No killin', though, Helmi, that's bad. And see, dear, I was forgettin' there's two letters for you—just came yesterday."

Helmi took them eagerly and opened one. "It's a mistake," she said, listlessly. "See, there's money in it. No one would send me money. It has been opened too, and sealed up again."

Mrs. Corbett took it out of her hand. "It's a for you, right enough," she said; "here's your name on it. It's a separation allowance for fifteen dollars from Arthur Warner, Eagle Mines."

"I do not know anyone called Arthur Warner," said Helmi.

"Well, he knows you, and that's better—anyway, he wants you to have the money, and you're a fool if you don't take it. Read the other one—maybe it will tell."

Helmi opened it and read. It was the letter Jack had opened at Eagle Mines. Helmi read it aloud to Mrs. Corbett. "I know now," she said. "He is a good man, that Mr. English. I will take the money—he means good by me."

"Sure he does," agreed Mrs. Corbett; "he seems like a good fellow, a good Englishman, and there's nothing finer in the world. Now Helmi, dear, I want you to lie down in Rosie's bed and have a good sleep, poor child. Now you'll be havin' trouble with your breasts, cuttin' off the baby so suddint, so I'll run in and borrow Mrs. Kalinski's breast pump—she's the grandest woman that for a neighbor, for she has everything from a boot-jack to curtain stretchers. You see in their business they get all sorts, and he gives her the run of the store—but have your sleep now, honey."

But Helmi's thoughts were not of sleep. She had a duty to perform, and which she had no desire to evade. One great purpose dominated her heart and cried aloud for fulfilment. The money which had come to her had made it possible. When Mrs. Corbett came back, Helmi was gone.

CHAPTER XXVII

Dr. St. John lay one evening on the chesterfield in his den, before a cheerful wood fire. Eva was entertaining her Wednesday night "Bridge," and tinkles of laughter, high-pitched and nervous, shot through the velvety murmurs of conversation.

The doctor had listened to such conversation many times, and knew the little razor-sharp points of antagonism it held and which seemed to pop out like needles from a squeezed pin-cushion, thin, sharp, unexpected, for the temper of the guests was uncertain. They had no community of purpose—they were pursuing no particular trend of thought, they were time killers, sensation hunters. He knew the very odor of the room — sachet powder, cigarette smoke, flesh of women too scantily clad, perfume heavy and exotic, a sweet smell, yet not wholesome—like good apples wanting air.

The doctor could see it all like a picture. The dark brown background, shot through here and there with little flashes of pale lightning that began in nothing and ended in nothing, led nowhere. Eva's friends met, chattered, parted, met again. No one wiser or better, more inspired to nobler living. They were doing nothing wrong—it was even worse than that, he thought—they were doing nothing.

The doctor recalled that it was Wednesday night. His mother always went to prayer-meeting on Wednesday night. How Eva would laugh if anyone mentioned prayer-meeting. And yet human nature was the same. But somehow it was geeting off the track. His mother had spent years on a treadmill, her days laid out for her in regular lines. Work stared at her from morning till night, and she did it, and held her head above it all. She was always sweet-tempered, interesting, sympathetic, Eva having nothing to do, did nothing, and doing nothing, degenerated, grew shallow, selfish, cross-grained and hard.

In his struggling days Dr. St. John had dreamed of having a house like this and a wife who would help him by her sympathy and understanding. But something had spoiled his dream. He had the house and the practice, and some one to spend his money, but—.

In some ways he had been to blame—he had been too easy, indulgent and foolish. Eva and her friends laughed at him, he knew. The ease with which Eva was able to deceive him furnished many a good story for the lively company which sat the bridge tables.

It was when his mother came to visit him a year ago that the doctor began to see Eva as she was. He had tried to imagine what she would be like when she was as old as his mother, who at sixty-five was as alert and eager-minded as ever, doing many of the things she had wanted to do all her life. To Eva she was a puzzle. How could anyone get such joy from going to the New Year Rally of Sunday School Children? Or why did anyone get up early on Sunday morning to go for a walk? Eva's studied politeness toward his mother irritated him, and it was a relief when his mother went over to Miss Abbie's to finish her visit. So passed another dream. He had so often thought of what a pleasure it would be to have his mother visit him. She was such a good sport, his mother.

Another matter was weighing heavily on the doctor's mind. More surgeons were needed at the front. Why should he stay here at ease? Dr. Brown, his young partner was seriously considering the matter. Dr. Brown had a wife and children—a wife who loved him. Dr. Brown had said that he would go, he being the younger man. That did not matter. Dr. Brown was needed here more than he, who had no one depending on him. Eva would be happier without him so long as the money held out.

These thoughts occupied the doctor's mind as he lay listening to the commotion across the hall. The first year of their married life, when he began to see that Eva had no intention of entering into his life seriously, he was sorely hurt. He had had dreams of domestic happiness since he was sixteen, and it is the loss of a dream that hurts the most. Now he was still hurt, but he was critical. When criticism begins to fill the mind the tenderness of love is over.

(To Be Continued.)

MEDICINE FOR YOUNG GIRLS
Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great turn. She is working out now in a store and walks three miles every morning and back in the evening."—MRS. MARY VANCE, 44 Lingan Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17 year-old girl."—MRS. ALFRED OUELETTE, Pinewood, Ontario.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTHACHE

As a child, you may have thought a tooth solid right through just as a piece of ivory which it resembled.

Then one day, you noticed that when something sweet got into the "hole" in a tooth, it hurt a little, but this soon passed away.

So you kept "mum" for fear you would have to go to the dentist.

Until, one night you wakened your parents with crying and announced between sobs that your tooth was "hurting."

Now, what had happened? Within each tooth is a chamber that is filled with soft tissue-blood" vessels and nerves, and the decay which is a disease process had been steadily progressing towards the "inside" until the soft tissue had become infected by the disease bearing organisms.

Then nature had rushed to the defense to combat them by sending into the tooth a greater supply of blood, containing millions of little warriors called "Phagocytes". Some of these burst through the vessel walls to attack the organisms and with this increase of blood there was a swelling of the tissue, causing increased pressure on the nerve endings—which signalled to headquarters—and so pain resulted.

And, just as in battle, as the fight wages, the wires grow hotter—so the nerves signalled more furiously, crying loudly—until, by and by the fight was over and the wires cooled off and the pain was stilled—and you were so glad that it was over, that you forgot to wonder how it stopped.

Little Helps For This Week

"His compassions fail not; they are new every morning."—Lamentations iii. 22, 23.

New every morning is the love
Our waking and uprising prove;
Through sleep and darkness safely brought,
Restored to life and power and thought.

New mercies each returning day
Hover around us while we pray;
New perils past, new sins forgiven,
New thoughts of God, new hopes of heaven.

—John Keble.

Each day, each week, each month, each year, is a new chance given you by God. A new chance, a new leaf, a new life, this is the golden, the unspeakable gift which each new day offers to you.

—Frederic W. Farrar.

Minard's Liniment for Insect Bites.

Royal Air Force Band

Will Be Heard At Western Points During the Summer Months

The band of the Royal Air Force, now on a three months' tour of Canada and an engagement at the Canadian National Exhibition at Toronto, is the youngest among the first-class bodies of military musicians in Britain.

The band, under rthe leadership of Flight-Lieutenant Amers, will play for a week at the fairs at Brandon, Man., Calgary and Edmonton, Alta., Saskatoon and Regina, Sask., and for two weeks at the exhibition at Toronto, late in August. In the interval, between the western fairs and the opening of the Canadian National exhibition, the organization will give concerts at Victoria and Vancouver, B.C.; Seattle, Wash.; Lethbridge, Alta., and Winnipeg, Man., as well as other cities, and finally will reach Montreal and Quebec.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

An Old Superstition

Two persons who wash their hands in the same water, or who dry their hands on the same towel are likely to go begging together, Sussex folk will tell you; but in the north of England, they say to do this signifies a quarrel.

Minard's Liniment heals cuts, bruises, etc.

Eczema Formed Painful Blisters Cuticura Healed

"Eczema started with a fine rash on my arms. Later it formed blisters about the size of a bean which were full of water and very painful. It burned and was so sore I could not bear to touch it. The weight of a cup in my hand would fairly make me cry out with pain. I had my hands and arms tied up from the ends of my fingers to my shoulders. Sometimes it kept me awake for hours.

"A friend recommended Cuticura Soap and Ointment so I sent for a free sample. I purchased more, and in about three weeks I was healed." (Signed) Miss Emily B. Davis, R. R. 3, Northwood, Ont.

Keep your skin clear by using Cuticura Soap, Ointment and Talcum for daily toilet purposes. Touch pimples and itching, if any, with Cuticura Ointment, bathe with Cuticura Soap and hot water.

Sample Each Free by Mail. Address Canadian Depot: "Cuticura, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Built For Extra Mileage

Firestone Gum-Dipped Tires assure greater safety, comfort and economy.

Gum-Dipping saturates and insulates every fibre of every cord with rubber—builds extra strength and endurance, while the scientifically designed tire tread grips the road and provides positive traction.

Your nearest Firestone Dealer sells these better tires. See him to-day and let him serve you better and save you money.

Edmonton Canning Factory

Edmonton's newest industry, the Broder canning factory, has started operations with 75 persons on the payroll. This is the first industry of this nature in Alberta.

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Eclectric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

The chayote, a vegetable similar to the cucumber and squash in taste, is raised in the Gulf Coast regions of the United States.

Don't Make a Toy Out of Baby
~Babies Have Nerves~
By RUTH BRITTAIN

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

There are
Two Sides
to this
Story

MOST people think of their Chevrolet dealer as a NEW-CAR dealer . . partly because of the large number of new Chevrolets which they see on the streets. But, while new car sales are the Chevrolet dealer's biggest reason for being in business, they form only *one side* of his activities. He must not only *sell* cars but he must also exchange them.

Every good, successful Chevrolet dealer must also be a good, successful Used Car dealer.

From his experience in selling Chevrolet cars, he knows motor-car values . . He knows that it is just as important for him to sell a Used Car as a new car . . He knows that Used Car buyers have a right to as much for their dollar and are entitled to as complete satisfaction as new car buyers . . He knows that satisfied Used Car owners will eventually become prospects for new cars . . He knows the value of good-will.

In short, our business as Chevrolet dealers depends on our reputation as used car dealers. That is why you are sure of a square deal and a sound dollar-for-dollar value, when you buy a used car here. UC-7-7-24C

Stony Plain and District.

Mecklenberg, the Optician, is making a tour of Stony Plain District this week.

A E Michael made a trip to Calgary this week.

Over 100 boys from the city are now encamped at the Rotary Club Camp at Edmonton Beach.

On Sunday last the ceremony of inducting the new pastor at St John's Lutheran Church at Blueberry took place. Rev C Thies of Edmonton, the Missionary Director, had charge of the service. The new pastor, Rev Osterman, comes from Revelstoke, B. C.

Contractor Sam Anderson has started on the construction of a new house for Martin Goebel on his farm north and west of town.

Results of Stony's Big Day.

The Dominion Day Sports in Stony Plain were favored with sunshiny weather, and a large crowd who gathered to witness the the ball tournament. The local band was present, the members were there in new uniforms. Good music was dispersed all through the sports.

Results of the games:—

Baseball—Walther League 14
Battery—Enders and Treit.
Spruce Grove 11.
2nd Game—Stony Plain 13.
Battery—Lory and Lappenbush
Holborn 12
Final Game—Walther League 11
Mohr, Enders and Treit.
Stony Plain 8.
Lory, McCulla and Lappenbush.
Football—Regulars 0; Scrubs 1.
Basketball—Stony 10 Visitors 8

Visitors from Saxony.

Stony Plain had, last week, two visitors from the oid country, Saxony, Mr C O Kunge and Mr Hans Klotz. These gentlemen have large estates in Saxony, but taxation is getting heavier all the time. They were making a tour of this part of Alberta, and were escorted by the agent, Mr P Werner, to several farms in this locality, including the large daira farm of Mr John Schutz, adjoining the town. They were very favorably impressed with conditions in this district, and intend re turning later with more prospective settlers.

Wembley District.

Mr John B Miller returned Friday from an extended trip thru Wembley (Peace River) district, and met a number of old acquaintances. John B speaks in very glowing terms of the prospects there are in that district for industrious farmers, altho, in one instance, a farmer who went up there early this spring onto a readymade farm had to reseed to oats a part of his wheat land, owing to the depredations caused by the cutworms. Another party of prospective settlers is leaving Stony in a short time, with the object of giving Wembley district a personal inspection, the Railway having offered the inducement of a round trip at single fare.

LOST, Child's Coat, near Sinner's Corner. Leave at Sun Office.

LOST, on Stony Plain Streets Friday afternoon, June 29, brown electrified Thibet Stole. Finder please return to telephone office. 13

Spruce Grove News

The Rev Mr Osterman, the new pastor at the Peace Lutheran Church, (Missouri Synod) preached his first sermon on Sunday last, to a large congregation.

Rev Mr Sander was inducted into the pastorate of the local United Church on Sunday last.

The "Duke" is being congratulated on his success as a weather prophet.

Mr A C Schum has started construction work on his new residence on his farm east of town.

Mr Ph Schram has pulled down his sawing outfit from Heatherdown and is now sawing on the A Tyrkalo place at Blueberry.

Mr Sherman's gas supply pump received a knockout blow Saturday afternoon when an auto-driver from the city backed into it.

Spruce Grove Picnic Results.

Special—Community race, members only, ladies, 50 yds.
Katy Singer 1, Mrs Graden
Ditto, Men, 100 yds
Ph Alt 1
Special prize for Mother of largest family on grounds
Mrs Modest Goble
Boys 100 yards—A Cascaden 1
Tug of war—The Grove v. The World; special prize
Stony Plain 1

The three ball games were particularly good, the first one resulted—Winterburn 4, Stony Plain 2; second game—Holborn 12, the Grove 9; third game—Holborn v Winterburn was a close game, and was won by the former by 8 runs to 7.

Duffield Doings

On Wednesday, June 27, a pretty wedding took place at St Dominic's Church when Margaret McGuire, daughter of Mr and Mrs James McGuire became the bride of Mr John Courtney of Killam. The ceremony was performed by Rev Father Keenan, Spruce Grove. Quite a large crowd were present to witners the happy event and extend congratulations to the young couple.

Some miscreant broke into the garage of Mr Cooper on Thursday night and slashed the radiator and cushions on his new Chevrolet Imperial Sedan. The same evening the radiator on Mr Parker's car was slashed. The latter gentleman is foreman of the work gang which is ballisting the Railway tracks at Duffield, while Cooper is the new section foreman.

Mr Mike Turlock left town on Friday for Edmonton.

Cole & Rogers Circus at Fair Grounds, Tuesday, July 10.

Now is the time to see—according to the young-ters and many grown-ups—the four greatest words in the English language, "The Circus Is Coming!" Assemble as many words as you will and there is no combination that can awaken the same thrill of expectancy as the announcement that the circus is on its way to upset for a day the social and domestic arrangements of town and country.

When the news spreads, as it will, with lightning speed, small boys will suddenly take on the characteristics of saints and the appearance of purity that will be surprising. Cole & Rogers Circus begins at once to gaily deck the countryside with its appealing lithographs and direct attention to TUESDAY, JULY 10, as the day when two performances will be given on the Fair Grounds in Stony Plain rain or shine.

Cole & Rogers promise a show that will gladden the heart of childhood and stir memories of youth for grown folk. Wild animals that have been pictured are coming with the circus in real life; strange beasts and birds from mountain and jungle. There will be a gala display of athletes, riders, trapeze performers and men and women of extraordinary ability in entertaining.

Curious animals and persons are in the allottment of Cole & Rogers attractions—ranging in size from the ponderous elephant to tiny "Pewee" the perfect formed horse; smallest in the world with a weight of 40 pounds and a heighth of only 26 inches. Pewee is indeed an equine curiosity, no larger than a watch-dog, yet perfect in form. "Pewee" is a tiny thing but is a rare attraction with a circus that has many other appealing items of delightful entertaining qualities.
